

Rooted in Diversity, Equity and Justice

PRODUCTS

Our suite of program management software tools makes running energy programs easy. Our tools provide data management, reporting, tracking, prioritization, calculations and more...

OASIS DER- Distributed Energy Resources

OASIS EQ- Equity

OASIS EV- Electric Vehicle Charging Infrastructure

OASIS TD- Transmission & Distribution

HISTORY

OASIS is an abbreviation for the key components of the work we do.

O- Optimization of natural resources

A- Awareness and Engagement

S- Saving energy

I- Infrastructure

S-Sustainability

Guiding Principles

1. We are guided by energy, justice, and equity.
2. We are rooted in servitude.
3. We will overcome barriers to a clean energy future.
4. We will leave no one behind.

CAPABILITY STATEMENT

OASIS Energy Partners, LLC

INTELLIGENT SYSTEM CAPABILITIES

DATA AUTOMATION

OASIS EP is introducing a new era of data automation. We've harnessed the power of best practices and experiential insights to craft a suite of tools that redefine program management. Moving beyond the limitations of spreadsheets and data trackers, our integrated systems establish a singular source of truth, enhancing efficiency and reliability.

OASIS I: The Interconnection Process is vital for a successful DER project. Challenges in this process lead to delays and increased costs. OASIS DER enhances data accuracy, monitors processing, and provides valuable data for better decision-making while insuring your investment.

OASIS EQ: Equity is integral to ESG and Energy Programs. OASIS EQ measures and reports on equity KPIs and Metrics in line with your project goals. It is a forward-thinking tool to support organizations in embracing equity.

OASIS EV: EV Charging Infrastructure is expanding rapidly, creating complex ecosystems. OASIS EV offers a standardized solution for administering EV Charging equipment, providing a unified front-end visualization of your entire EV Charging Ecosystem. It's equipment-agnostic providing an enterprise level command center for owners to efficiently operate their ecosystem.

OASIS TD: Grid resilience and modernization projects are vital for utilities, but they often face challenges due to supply chain disruptions and workforce shortages. OASIS TD streamlines project management for T&D projects with automatic prioritization and protocols, ensuring smooth workflow progression with approvals and escalations as needed. The system standardizes best practices, enabling utility engineers to focus on fieldwork and other critical tasks to meet annual goals.
